

Resident/Tenant Preparation List for Heat Treatment

Heat-Assault equipment is proud to offer the least amount of preparation on the market prior to heat treatment!!

Resident must remove:

- All plants and animals/pets are removed.
- Fresh fruits and vegetables, chocolates, carbonated beverages, wines, and liquors
- Candles, wax, crayons, lipstick and other cosmetics that may melt.
- All medicine and vitamins
- Arts and craft items that are assembled with hot melt glue.
- Software, vinyl records, CD's, tapes (audio and video) stored to avoid warping.
- Oxygen tanks, Aerosol containers, fire extinguishers, cigarette lighters and other combustible items
- Musical instruments (may detune due to expansion and contraction)
- Magnets are stored or removed (like those used to hold notes on refrigerators) or they may lose some strength.
- Oil paintings, acrylics (art work) are removed from the heat treatment area and other paintings and pictures are taken off the wall and placed on the floor.

Other Important Preparations:

- Computer Towers, TV, Stereo and clocks should be **UNPLUGGED**. (*Except stove, fridge and freezers*).
- For the heat to permeate clothes they must be hung up or in drawers, but not more than three inches in depth.
- Similarly, clutter must be reduced or eliminated.
- Plastic blinds, must be removed, pulled tight, and left on the floor.
- Excess piles of paper/magazines must be disposed of.

**** THE MORE CLUTTER, THE LONGER THE TREATMENT WILL TAKE!!****

NOTE: *Some items can be stored in an insulated location like your stove, fridge or freezer. If you require medications, please ensure that you have taken a daily supply with you. Resident will not have access to their unit or home and/or goods until completion of treatment.*

A SUCCESSFUL TREATMENT RELIES NOT ONLY ON THE DURATION OF THE TREATMENT BUT THE PREPARATION OF THE RESIDENT AS WELL!
